Brett Frishmann, Villanova University, Charles Widger Endowed University Professor in Law, Business and Economics, who will discuss cyber abuse and artificial intelligence and their social impact within the broader digital network environment.

Brett Frishmann is a renowned scholar in intellectual property and Internet law and an affiliated scholar of the Center for Internet and Society at Stanford Law School. He is the author of a recently published book, *Being Human in the 21st Century: How Social and Technological Tools are Reshaping Humanity* (Cambridge University Press), which examines if the digital age is draining our humanity and causing us to become more robotic ourselves.
